

Agenda

9:45	Welcome & Introduction
10:00	OAE History, Anatomy and physiology The relevant anatomy and physiology for OAEs and the history behind their discovery.
10:45	OAE equipment Covering the hardware needed to perform OAE testing and the relevant checks, calibration and daily maintenance needed to run the systems.
	Comfort Break
11:30	Workshop: Performing OAE testing Practical demonstration of OAE testing and a chance to perform the tests. Guidance on pre-test examinations and patient instructions
12:30	Lunch
13:00	Selecting the right protocol and settings A detailed analysis and description of the different settings and parameters involved in OAE testing and how to set up protocols.
14.00	Analysing results A detailed analysis and description of how to interpret the different results and components of OAE testing.
	Comfort Break
15:15	Screening Vs Diagnostic OAEs Much of the course so far has covered diagnostic OAE testing but there is a huge demand for OAEs in the context of hearing screening. This session will cover the specifics of screening and different clinical contexts.
16:00	Finish / Close
